

CENTER FOR DIGITAL HUMANITIES SENIOR THESIS PRIZE

The Center for Digital Humanities Senior Thesis Prize will be awarded to the thesis that best directly utilizes, engages with, or contributes to the field of digital humanities. The prize carries an award of \$1,500 and may be received by up to two students.

An eligible thesis must make a meaningful intervention into the interdisciplinary area between computer science and the humanities. This can be achieved by using digital tools to map, organize or produce humanities-based research, or by bringing digital methods of data analysis and thought into critical conversation with humanities material. The thesis can be itself a digital humanities project, or incorporate digital humanities research into a larger framework.

To qualify for nomination, the student's thesis must receive a grade of straight A or A+ from both readers. In exceptional cases, the committee will consider theses that have received an "A-" grade from one of the readers as long as the second grade is an A or an A+ and the advisor includes an explanation of why the thesis merits a prize. Departments may submit up to two (2) nominations.

Nominations are due **Friday May 17th**. For each nomination send the following as PDF attachments to cdh-info@princeton.edu: thesis, readers' comments, and evaluations (including grades). For questions, please contact the CDH's Project and Education Coordinator, Dr. Rebecca Munson (rmunson@princeton.edu).
